Instructor's Manual MATHEMATICAL METHODS FOR PHYSICISTS

The term field refers to a quantity that has values at all points of a region; if the quantity is a vector, its distribution is described as a vector field. While we already have a standard name for a simple algebraic quantity which is assigned a value at all points of a spatial region (it is called a function),...

Mathematical Methods for Physicists - 7th Edition

The solution is given in the text. 2.1.6. If a set of forms is linearly dependent, one of them must be a linear combination of others. Form the determinant of their coefficients (with each row describing one of the forms) and subtract from one row the linear combination of other rows that reduces that row to zero.

CHAPTER 3. EXERCISE SOLUTIONS 13

1.3.3. The solution is given in the text.

Convergent for $0 < x < 1$. The upper limit x does not have to be small, but unless it is small the convergence will be slow and the expansion relatively useless.
