Project Gutenberg is a wonderful source of free ebooks – particularly for academic work. However, it uses US copyright law, which isn't universal; some books listed as public domain might still be in copyright in other countries. RightsDirect explains the situation in more detail.

Guardian review: Something New Under the Sun by John McNeill

Something New Under the Sun: An Environmental History of the Twentieth-Century World by J.R. McNeill is a book about just that, the environmental history throughout the course of the twentieth century leading up to the present. This novel by J.R. McNeill covers the environmental history of the twentieth century and how the environment impacted the course of events in the twentieth century and how the decisions made by people during this same time frame impacted the environment.

John Robert McNeill (born 1954) is an American environmental historian, author, and professor at Georgetown University. He is best known for "pioneering the study of environmental history". [1] In 2000 he published *Something New Under the Sun: An Environmental History of the Twentieth-Century World*, which argues that human activity during the 20th century led to environmental damage on an unprecedented scale.
