Evaluating Research in Academic Journals: A Practical Guide to Realistic Evaluation

Evaluating Research in Academic Journals: A Practical ...

Here are some clues that may help you: 1) Look for a list of references (a bibliography) at the end of the article. 2) If the article is less than half a page in length, it is not a research article. 3) Look for credentials after the author (s) name. 4) If the title of the publication has the ...

Assessment, evaluations, and definitions of research ...

In the US, the criteria for evaluating research grant applications at the National Institutes of Health include short definitions of five concepts: significance, approach, innovation, investigators, and environment (NIH, 2008). In a recent evaluation of research constellations within a large university in Sweden,...

Evaluation: SAGE Journals

A coalition of scholarly publishers and associations collaborated to create this short checklist for authors to refer to when evaluating a journal as a possible place of publication for his research. By asking a few short questions and evaluating the journal according to the checklist, authors can be assured that the journal they are considering, whether subscription based or open access, will ...

Evaluating Research In Academic Journals

Evaluating Research in Academic Journals is a guide for students who are learning how to evaluate reports of empirical research published in academic journals. It breaks down the process of evaluating a journal article into easy-to-understand steps, and emphasizes the practical aspects of evaluating research – not just how to apply a list of technical terms from textbooks.
