### **Feed the Soil - Dr. Weil's Organic Garden**

In the nutrient-rich area around the root hairs, microscopic bacteria and fungi feed and multiply. Nematodes (tiny worms) and other critters move in to feed on the bacteria; in turn, the root hairs absorb nutrients released by the population of these microbes. This is how the Soil Food Web works....well, in a nutshell at least.

### **Soil Quotes (88 quotes)**

"Feed the soil, not the plant. If there's one thing you take away from this lecture, this is it!" Master Gardener Linton Studdiford told the capacity crowd gathered to hear his talk about organic soil management in the St. Paul's Church parish hall on a chilly January afternoon.

### **Feed the SOIL, not the plant | LawnSite**

The soil here had not been improved with organic matter for many years until I arrived and in just two years it has been transformed with the addition of liberal amounts of mushroom compost, some gritty sand and, in some areas, some lime or calcified seaweed (substitute).

### **Feed The Soil Not The**

Feeding the Soil. Now from the above, we're getting to the meaning of 'feed the soil'. Obviously you can't feed rock, water or air. Nor can you feed dead vegetation. But you can feed the organisms that live in the soil, from bacteria to earthworms and everything in between.

### **Feed the Soil - Not the Plants - Allotment & Gardens**

Feed the soil, not the plant. When we focus on feeding the plant itself, we are taking a reactive, temporary approach that looks only at what exists in the moment. Feeding the soil, meanwhile, is about focusing on the long-term, creating those healthy conditions that can support this plant, and every plant that follows.

### **Feeding the Soil Feeds Your Plants - Bonnie Plants**

Feeding the soil has also been the cornerstone of modern organic agriculture since one of its principle founders recognized that "the undernourishment of the soil is at the root of all". Research has shown that crops will not grow optimally, or utilize other nutrients efficiently, ...

### **Using Soil Tinctures to = "Feed The Soil, Not The Plant ...**

The best part of this feeding the soil approach is that, although your garden plants will not start off with a flush of green, they will finish well when it counts. Producing more tomatoes, healthier and tastier green vegetables, in almost every way the feed the soil approach is better for you and your family.

### **Feed the Soil, Not the Plant! | tworockchronicles**

Plants are not independent organisms. They are highly dependent on many other critters in the soil: fungi, bacteria, nematodes, microarthropods, protozoans, insects, worms... the list goes on. We have barely begun to understand all the relationships between plants and these other life forms.

### **Feed the soil, not the plant | Beth Maiden**

Use soil tinctures to put into practice the organic gardening motto "Feed the Soil, Not the Plants". Learn how to activate your soil & recognise the difference between living & non-living soil.
