### **(PDF) Management of Drip/Trickle or Micro Irrigation ...**

Drip, or trickle, irrigation is a method of uniformly delivering water and nutrients to a plant's root zone in the precise amounts required to meet the needs of the plant (Roberts 2004). Drip irrigation was used in Europe as early as the 1860s when a type of trickle irrigation system was developed for subsurface irrigation in Germany by using perforated irrigation pipe ( Ross et al. 1978 ).

Trickle charging means charging a fully charged battery at a rate equal to its self-discharge rate, thus enabling the battery to remain at its fully charged level; this state occurs almost exclusively when the battery is not loaded, as trickle charging will not keep a battery charged if current is being drawn by a load. A battery under continuous float voltage charging is said to be float ...
