It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' textbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator - a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

Background: Rapid Sequence Intubation (RSI) is the standard definitive airway management in the pediatric emergency department (PED). There are limited data describing time to intubation (TTI), adverse events (AE), and process variation for RSI in the PED. Prior studies demonstrate the first pass intubation success rate (FPISR) is between 26-85% and, the RSI-associated AE rate is between 20-61 ...

Pediatric Emergency Care

Abstract: Pediatric rapid sequence intubation is a skill of great importance to emergency medicine physicians. Developing a systematic strategy for approaching an emergent airway aids in the proper handling of this event. This paper is a review of the current recommendations for pediatric rapid sequence intubation including current medications and surgical rescue techniques.
